# who are WE?

**OptiSaver** was born from a father's mission to find **quality glasses at a fair price** for his daughter. Frustrated by **hidden costs and unclear pricing**, he envisioned an eyewear brand built on **transparency, affordability, and expert care.**

By **eliminating middlemen, sourcing directly from manufacturers, and adopting minimalist store designs**, OptiSaver ensures customers get **high-quality eyewear without unnecessary costs**. More than just glasses, it's a commitment to **clear vision, trust, and accessibility for all.**

we provide **Superior  
Premium Quality**

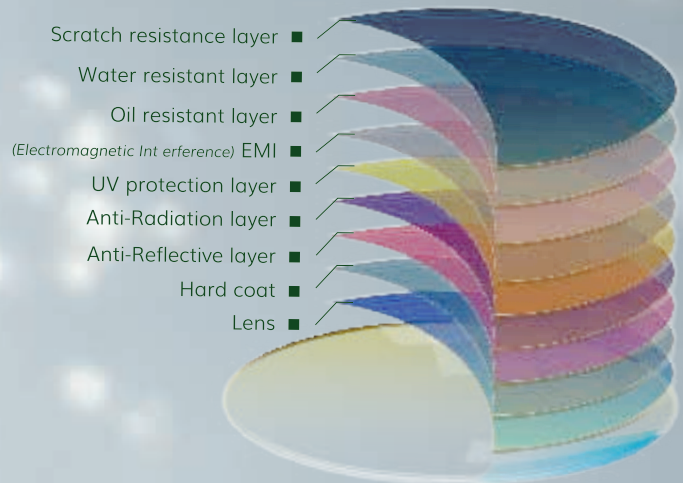

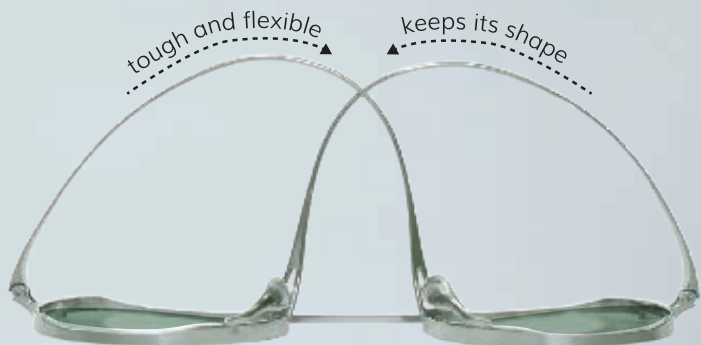

**why us?**

“

## **KireiKōsen Japan Lenses:**

aspheric design with Anti-UV & Anti-Blue Ray protection, featuring Super Hydrophobic Multicoating for water & dust repellence, anti-smudge, & anti-glare properties. Enhanced with Coating Protection Technology for impact and scratch protection, with Sun-changeable features.

”

“

## **Designer Titanium Frames:**

discover the Japanese Designer Titanium Frame, an **ultra-light, durable, and flexible** eyewear option. Crafted from high-grade titanium, it offers all-day comfort and long-lasting use. **Hypoallergenic** and **stylish**, this frame combines Japanese design with advanced material technology for exceptional comfort and durability.

”

**Should've gone to **  
**OptiSaver!**

**Stop Incorrect Pupil Distance  
Eyewear Before It Changes You.**

Prolonged use of incorrect Pupil Distance (PD) misaligns lenses, strains eye muscles, and may cause crossed eyes.

# “ A New View on Life ”

“ At 20, I failed a color vision test during a special forces interview—completely unaware of my condition. After struggling to find a solution, OptiSaver reached out with specialized contact lenses. Intrigued, I traveled from Jerantut to Seremban for an assessment. To my surprise, I passed the test effortlessly! They also improved my overall eye health, tackling issues like glare. Thanks to OptiSaver, my quality of life has transformed.”

– Fadzil, Jerantut

# “ Precision Matters in Eyewear ”

“I traveled from Singapore just to fix my glasses. Despite visiting multiple shops, I struggled with slipping frames, nose pain, and headaches. The optician found them misaligned, causing eye strain. But with precise adjustments, my glasses finally fit. The moment I put them on, I smiled and said, 'Wow! My vision feels so natural now.' This experience proved that a well-fitted frame isn't just about comfort—it transforms vision and quality of life!”

– Andrew, Singapore

## what is Multifocal?

A **multifocal lens** is a special type of lens that is designed with multiple zones, each with different power prescriptions. These lenses allow people to see clearly at various distances - up close for reading, mid-range for computer work, and far away for driving, without the hassle to switch between different pairs of glasses.
